DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a vacuum pump having a branched water cooling pipe.

Group II, claim(s) 3 and 4, drawn to a vacuum pump having a jointed cooling pipe.

Group III, claim(s) 5-10, drawn to a vacuum pump having a thread pump section.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The inventions have only the following features in common: a vacuum pump for sucking and discharging gas, a rotor, a stator column, and a cooling water pipe buried in the stator column.

3. These limitations are clearly shown by Shrader (US 3,877,546), which teaches a vacuum pump (col. 2, ln. 15) for sucking and discharging a gas (col. 2, ln. 65-67), including a rotor (79) and a stator column (103) in which a cooling water pipe (117) is buried. Because these limitations are known in the art, they cannot constitute a special technical feature, and the claims lack unity.

4. A telephone call was made to Franco Deliguori on 8 September 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
